

Hands-On Data Analysis for ININ Using R

Prof. Dr. Cornelia Storz, M.Sc. Fei (Michael) Wang

Management and Microeconomics, Goethe-Universität Frankfurt

This document was prepared for students who are taking ININ course and planning to take the exam. It is a collection of notes and codes for the course. The notes are based on the tutorials we had in the course. I am trying to make it concise and easy to understand. I hope it can help you to review the course and prepare for the exam. *We are living in a very noisy world, therefore let's keep it simple and clear.* I setup a challenge for myself to deliver a clear and concise review notes within 15 pages. I hope you enjoy reading it.

Keywords: econometrics, data analysis, regression models, empirical research, innovation, management
